## **Projects:**

### **1. Ops portal:**

Features:

Duration: **1 year**, Framework: Ruby on Rails , Team size:2

Features:

Its an dashboard application which manages all the console related activities through the help of graphical user interface. All the linux related command line utilities can be executed in this single window dashboard. It involves active directory authentication for user login.

**Skills used: Rails 4 ,Ruby 2.1.3, JQuery,Mysql,bootstrap**

### **2. Global Delivery and capacity performance management:**

Duration: **6 months**, Framework: **Ruby on Rails**, Team size: 2

Features:

Its an application which collects vital statistical information from different HP servers located in different regions and compare them with each other. It includes performance tuning based on the statistics collected.

Skills used: Rails 3 ,Ruby 1.9.3,Jquery,Mysql,bootstrap

### **3. Enterprise Application Software & Client interface:**

Duration: **8 months**, Framework: **Ruby on Rails**, Team size: 5

Features: It's an Enterprise Application Software done in Rails. Includes features such as Customer Relationship Management (CRM), HR Management, Quality Assurance, 360 degree evaluation, Client Portal for the clients to check the real time status of the work, Task Management, etc. It's a single interface to monitor the employees and communicate with clients.

I played a vital role in this project. I was responsible for the Quality Assurance, HR Management, 360 degree evaluation and CRM modules.

Skills used: Rails 3 ,Ruby 1.9.3,Jquery,Mysql

### **4. Company Invoice Application:**

Duration: **6 months**, Framework: **Ruby on Rails**, Team size: **3**

Features: Application to create, send and track invoices in a company for the project and customer expenses, receive payments and track the overall health of the business. This project was mainly built to reduce the time it takes to manage the paperwork.

Skills used: Rails 3 ,Ruby 1.9.3,Jquery,Mysql

## 5. **E-HR: Process automation project for an automobile firm**

Duration: **8 months**, Framework: **Ruby on Rails**, Team size: **4**

Features: Complete automation of HR process in an automobile firm. Everything is handled by the application, beginning from pre-recruitment phase till Employee is relieved from the company. It was a freelance project. Admins can login and use the application.

Skills used: Rails 3 ,Ruby 1.9.3,Jquery,Mysql ,bootstrap

## 6. **Carbon Offset:**

Duration: **4 months**, Framework: **Ruby On Rails**, Team size: **4**

Features: This was an environmental project solely handled by me. Its main objective is to reduce the global warming by neutralizing the carbon footprint. This project calculates the carbon footprint and the person has to fund in any of the environment projects undertaken by the carbon offset companies to neutralize the carbon footprint created by him.

Rails 3 ,Ruby 1.9.3,Jquery,bootstrap

## 7. **Migration of Routers: Client Cisco**

Duration: **10 months**, Team size: **10**

- Worked on **Cisco7600-Cisco ASR903** Migration:
  - Hardware migration, which gives detailed information on hardware available on both Source and Destination. Provides recommendations for the customer in Hardware upgradation.
  - Software migration, which gives detailed information on which technologies can be configured on both Source & Destination, and also provides with configuration CLI equivalent to the source configuration for all available features on the destination device.
- Worked on **Alcatel 7750SR- Cisco ASR9000** :
  - Software migration, which gives detailed information on which technologies can be configured on both Source & Destination, and also provides with configuration CLI equivalent to the source configuration for all available features on the destination device.

**Hobbies / Extra Curricular Activities:**

- Open source enthusiast
- Swimming, Playing Cricket, trekking
- Interested in adventure sports
- Traveling and exploring Nature
