Google Analytics, Flurry, Fabric (*crashlytics*), Hockey SDK, Test Flight (*iTunes Connect*)...

Cloud services :

Google, Parse, Vimeo...

Platforms :

Mac OSX (2+), Linux (*Ubuntu, Fedora*) (2+), Windows....

WORK EXPERIENCE

Sufalam Technologies Pvt Ltd. (<http://www.sufalamtech.com>)

Since : 2011 - present

Sr. Mobile Application Developer

- Expertize in iOS & Android technologies. As being senior, my role is to **develop & lead** the projects, **communicate** with clients, gathering project requirements, creating **reusable code/libraries** (which can be reused in project to save development time). At present I am developing iOS application and leading the Android projects.
- Ability to **work & handle in multiple projects**. I am ever ready to work with new technologies. It has been 4 year with Sufalam Technologies where I have developed many more mobile applications.
- Following, I have mentioned **few reference applications** which has been developed by **ME**.

----- [Few Reference Applications] -----

● -- iOS apps --

- 1) **Nector** : Allows job seeker to connect with recruiters. They can do chat, make a note, match analysis etc. App is developed using **Parse** as backend - [Chat using PubNub, Image sharing, Emoji, Parse, cURL, Significant Location Change, SQLite3, Fabric, Google Analytics]
<https://itunes.apple.com/us/app/nector/id1023116720?ls=1&mt=8>
<https://itunes.apple.com/us/app/nector-pro/id1039750441?ls=1&mt=8> (Nector Pro)
- 2) **Betera** : Get list of nearby restaurants, Get list of food items available at restaurant, share your dish (food item) by publishing video/photos, like/comment on food item, view food item's like/shares/comments done by other users. App is developed using **Parse** as backend.
- [Vimeo API (to play/upload/store videos), Parse, Social Sharing (facebook, twitter, pinterest)].
<http://www.betera.co> - Under development
- 3) **Twambox** : Everything we do in our lives, whether it is at work, home, school, holiday, an event or an activity, involves four 'must haves': people (**Team**), communication (**Wall**), files (**Assets**) and transaction (**Money**) - **TWAM**. [Social sharing, REST API, AFNetwork, Image caching, Chat (XMPP), Group chat (XMPP), File sharing through chat, SQLite3, Vimeo API, APNS etc].
<https://itunes.apple.com/us/app/twambox/id889966935?mt=8>

● -- Android apps --

- 1) **SnagMobile** : Smart way to order food & drinks - [Multiple device support, Localization, Lazy loading, Google Volley, PayPal Integration, PDF creation, GCM etc.]
<https://play.google.com/store/apps/details?id=com.snagmobile>
