ABOUT ME

I am a 23 years old Designer from Erode currently based in Bangalore. An enthusiastic Front-end designer and developer, creating and crafting delightful user experiences at a pixel by pixel detail and how these experiences across products and devices interact with and take part in a larger eco-system. Always preferred to learn from what makes it happen from deep underhood.

Inspired by people, design and nature and how we might achieve harmonies between these as we create experiences through technology.

PROFILE SUMMARY:

- IMD Star Technologies Private Limited and Clobas Private Limited are the two children companies of CVT Technology Solutions Private Limited which is in existence for more than two decades. Myself, handled all design and interaction aspects for these two companies.
- A young persevering Front-end designer with hand full of experience by working simultaneously for two start-up entities and many freelancing works.
- Proficient in grasping new technical concepts and utilizing them in an effective manner.
- Effective Communicator & team player with strong analytical, problem solving and design skills.

PROJECTS HANDLED:

- IMD Star Technologies Private Limited is mobile app based company and we have to research and analyze the demand of clients and to make them mobile application.

My Role:

- Built website
 - Research and Case Study on client demands
 - Problem analyzing and Prepared statements
 - Sketching & Wire framing of App from the gathered details in such a way that target audience feel easy to use as they expected (UX).
 - Built top-notch User Interface Design (UI) from wire frame and Prototype.
 - Maintained social network and SEO
- Clobas Private Limited is a school software based company which maintains all details of schools including attendance, marks, TC's and more, with both Web portal and mobile app.

My Role:

- Built website
 - Created mobile app UI for management, teachers and parents separately
 - Created Transfer certificate, Bonafide certificate and Fee receipts in Web(HTML) of every school in their existing design.
 - Maintained Social network and SEO
- In my free time I did freelancing works for various clients through my friends for acquiring different domain knowledge and polishing my skills. Some of my freelancing works:

- Created logo, branding and identity, website design and development, business card, brochures and more for health care entity (HAFYA™ LABS Private Limited, Hyderabad). Their website includes www.hafyalabs.com, www.hafyaline.com, www.hafyaconnect.com and www.hafyaclinics.com.
- Worked for an Event Management company (Lagna Events) on their Logo, website (www.lagnaevents.co.in), branding, Social media marketing and also for the events they organised.
- Worked on UX/UI Design and Branding design for a Document delivery company (EARY Delivery App) (<https://www.behance.net/gallery/52097919/EARY-Delivery-App-UI-and-UX-design-Branding>)
- Created website for a Cyber Security company (Foilr).
- Worked on UI Design for TLS Cleaning App (<https://www.behance.net/gallery/51787617/TLS-Cleaning-App>)
