PROJECTS HANDLED

Project # 1

Project Name : BAP PROFESSIONAL (ARTHAVIDHYA)
Technology : PHP (Mysql)
Tool Used : Junit, Selenium WebDriver, Mantis, Testlink, Fengoffice
Testing Type : Manual Testing , Automation Testing.
Team Size : 14
Role : Test Lead
Duration : Dec' 2013 to till present
Project Scope :

This is an Online, Interactive, Job oriented, skill development course that enables students to learn and practice the accounting processes performed across enterprises in India. It helps users in understanding process steps and documentation requirements to complete multiple and complex corporate transactions. Upon completion of the course, the student would have learnt to apply the accounting concepts that a corporate enterprise requires.

Responsibilities:

- Writing, reviewing, and executing of test cases using Test cases design technique.
- Module assignment to testing team.
- Smoke testing on critical or basic feature of an application.
- Functional testing on each and every component of an application.
- Testing the integration of an application, based on business transaction scenarios.
- System testing whether end feature is working or not.
- Ad-hoc Testing.
- Prepare Weekly/Daily testing team report.
- Took several interview for manual and automation testing.
- Regression testing after the fixing bugs and verified that the fixes didn't create problems elsewhere.
- Compatibility testing for an application in different Browser, Operating system and hardware.
- Preparing Requirement Traceability Matrix for Test cases and Requirements.
- Requirement verification with higher level management team.
- Discuss impact of new requirement on old users with management team.
- Retesting of "fixed" defect & classifying them as "closed" or "re-open."
- Detecting bugs & classifying them based on severity, priority.
- Involved in the preparation of Hybrid framework design.
 - Estimate testing team time frame to implement new requirement.
- Writing and executing Test scripts using WebDriver.
- Reviewing Test cases.
- Give KT to testing team.
- Identifying features for the regression testing and performed Regression Testing.
- Preparing regression suite for the automation.
- Reviewing Test Script Review.
- Developing Configuration and Navigation script.
- Executing the test scripts, analyzing the results and updating the status
- Identified Defects, report them and retesting the fixes.

Project # 2

Project Name : BAP EXECUTIVE (ARTHAVIDHYA)
Technology : PHP (Mysql)
Tool Used : Junit, Selenium WebDriver, Mantis, Testlink, Fengoffice

- Retesting of "fixed" defect & classifying them as "closed" or "re-open."
- Detecting bugs & classifying them based on severity, priority.
- Involved in the preparation of Hybrid framework design.
- Writing and executing Test scripts using WebDriver.
- Reviewing Test cases.
- Identifying features for the regression testing and performed Regression Testing.
- Preparing regression suite for the automation.
- Reviewing Test Script Review.
- Developing Configuration and Navigation script.
- Executing the test scripts, analyzing the results and updating the status
- Identified Defects, report them and retesting the fixes.

Project # 4

Project Name : Esparsh
Technology : Java (Mysql)
Client : Rediance System
Testing Type : Manual Testing and Automation testing.
Team Size : 5
Role : Fixed term quality Analyst
Duration : March' 2012 to May' 2012
Tool Used : Bugzilla V3.2.
Project Scope :

This is [Human Resource Management System] HRMS Management System project. Here the all the company employee details are stored in the software. An employee can mark his/her attendance using this software. Can also view his/her personal information, salary details, leave details. Employee can also submit his/her leave in the software, if the employee needs leave for few days. Even the admin has the right to view everyone's information. Admin can increment the employee salary using this software. There are 2 types of users, employee and admin. Employee can view only his/her particular information like leave details, personal details, salary details etc. Admin has the rights to view and update everyone's detail. Salary calculation is done automatically every year depending on his/her leave details and also depending on his/her other details. Using this software the admin will come to know about the overall and single employee's details, which will help the admin to understand the statistics of the company employee.

Responsibilities:

- Smoke testing on critical or basic feature of an application.
