Dewas • 05/2013

High School Diploma
Percentage: 90.60%

PROFESSIONAL SUMMARY

Javascript developer with over 2.5 years of successful experience in NodeJs and Technical Support lead. Recognized consistently for performance excellence and contributions to success at Johnson and Johnson(client).

WORK HISTORY

Tata Consultancy Services - Support Analyst(Myacuvue App)
Bengaluru, Karnataka • 08/2019 - 02/2020

- **Lead and mentored Backend Support Team**, to handle data fixes, and implement scripts for automatic data fixes, successfully handling **E-commerce mobile app with 350k+ active customer base** from Singapore, Korea and HongKong .
- Created **real-time streaming graph** for analysis of API hits to the Postgres database using **Plotly.Js**
- Co-ordinated with clients and development teams for efficient enhancements.
- Decreased data discrepancies by implementing **Javascript reconciliation scripts** to keep a check on data in the database.

Tata Consultancy Services - NodeJs Developer(Myacuvue Mobile App)
Bengaluru, Karnataka • 01/2018 - 07/2019

- Developed **Server-side Rest APIs** for Johnson and Johnson Myacuvue Mobile App.
- **Wrote Async-Await** functions for managing CRUD operations on the **Postgres database**.
- Wrote **Regex** for parsing queries. Implemented pagination and sorting.
- Used the **Knex library** for database connection and query building(Postgres database).
- Implemented **Winston** for logging nodeJs events and errors.
- Implemented **Jmeter test cases** for load testing of the app, thus successfully helping AWS team decide on number of EC2 servers required to manage application Load.
- Worked under strict **agile curriculum**.
- Used **git** for source code management.
