OperatingSystem: Windows

RolePlayed: Developer

Responsibilities / Contribution:

- * Worked on a complete new big module (HSF Horizon service fees) for One year contract with total 4 developers and 1 tester. We completed the delivery with Zero bug delivery and 100% code compliance. I was included in complete coding and designing phase in the project. Client appreciated our work and insisted team spot award. This was the first time we worked in Agile methodology and we adapted it so fast that client appreciated and was considered for across Mind tree.

- * Implemented a new use case (Frequent Flyer– Miscellaneous document mask) with one member under me. There was only single MIT bug and Zero bug delivery to customer. All the process and compliance were above standard.

- *Worked on new use case (ticketing) individually and zero bug delivery.

- * I have worked on so many bugs and issues and solved it very quickly.

- * I am in charge of certain modules like Ticketing.

- * Updating and interacting with the clients on the updates.
